Oamprakash R.

Lead Android Developer
+91-9940931741 | oamprakash85@gmail.com

PROFILE SUMMARY

Android developer with 12+ years of hands-on experience building and leading Android applications using Kotlin and Java, from requirement analysis and architecture through Play Store release. Strong command of the Android SDK, Jetpack libraries (ViewModel, LiveData/Flow, Room, Navigation, WorkManager), and modern UI development with Jetpack Compose and XML. Deep grounding in OOP, SOLID principles, and Clean/MVVM architecture, with practical experience in Coroutines, Flow, and concurrent/asynchronous programming. Comfortable owning problems end-to-end — from requirement analysis and API contracts to data persistence, security, testing, and mentoring — within Agile/Scrum teams.

TECHNICAL SKILLS

- **Languages:** Kotlin (primary), Java (interoperability)
- **Android Core:** Android SDK, Android Studio, Gradle, debugging & performance profiling tools
- **Jetpack & UI:** Jetpack Compose, XML layouts, ViewModel, LiveData, Flow, Navigation, Room, WorkManager, Material Design
- **Architecture:** Clean Architecture, MVVM, MVI, OOP, SOLID principles, modular & scalable app design, reusable shared libraries & Compose design systems
- **Dependency Injection:** Dagger, Hilt
- **Concurrency:** Coroutines, Flow, RxJava, multithreading, memory management
- **Networking & APIs:** Retrofit, OkHttp, RESTful API contracts, GraphQL, Picasso
- **Data & Storage:** Room, SQLite, Firebase (Firestore, Realtime DB, Remote Config), Supabase, caching strategies
- **Security:** OAuth 2.0, JWT, biometric authentication, data encryption, certificate pinning, secure transmission
- **Testing & QA:** TDD, JUnit, Mockito, Espresso
- **Monitoring & Analytics:** Firebase Crashlytics, Sentry, Datadog, Firebase Analytics
- **DevOps & Tools:** Git, SVN, Gradle, CI/CD pipelines, JIRA, Confluence
- **AI-Assisted Development:** GitHub Copilot, Cursor, Claude Code, Gemini Nano (on-device AI)
- **Leadership:** Requirement analysis, Agile/Scrum, SDLC, team management, code reviews, mentorship, stakeholder communication
- **Team Size:** Led a team of 20+ Android engineers

CERTIFICATIONS

- Advanced Programming in Kotlin – Meta
- Android Jetpack Components – Coursera

PROFESSIONAL EXPERIENCE

Lead Android Developer | Movate, Chennai — July 2020 – Present

- Conducted requirement analysis with product, engineering, QA, and design stakeholders, translating feature requests into technical specifications and aligning cross-functional teams on technical direction and release priorities.
- Architected scalable Android applications in Kotlin using MVVM, MVI, and Clean Architecture, applying SOLID principles and design patterns to improve reliability and scalability and reduce technical debt.
- Built modern UI with Jetpack Compose and XML layouts, using Jetpack components (ViewModel, LiveData, Flow, Navigation, Room, WorkManager) for robust state and data management.
- Used Coroutines and Flow for asynchronous programming and concurrency, integrating Retrofit, OkHttp, and GraphQL for API integration against defined contracts.
- Implemented secure authentication and authorization with biometric integration, encrypted local storage, certificate pinning, and secure data transmission.
- Set up and maintained CI/CD pipelines to automate build, test, and release workflows, and managed Play Store release processes including build variants and app signing.
- Integrated Sentry and Datadog for monitoring and crash/error tracking, and Firebase Remote Config for feature flagging and A/B testing.
- Accelerated development velocity using AI-assisted coding tools (GitHub Copilot, Cursor, Claude Code) for code generation, refactoring, and review, and explored on-device AI with Gemini Nano.
- Drove performance optimization across app startup time, memory usage, and rendering, using Android Profiler and systematic performance testing to improve stability at scale.
- Managed and led a team of 20+ Android engineers, owning sprint planning, task allocation, and delivery timelines.

- Drove code quality through regular code reviews and TDD-driven unit/UI testing (JUnit, Mockito, Espresso), mentoring junior and mid-level developers on modern Kotlin and architecture best practices within Agile/Scrum.

Tech Stack: Kotlin, Jetpack Compose, MVVM, MVI, Clean Architecture, Retrofit, GraphQL, Dagger/Hilt, Room, Coroutines, Flow, CI/CD, Sentry, Datadog, JUnit, Mockito, Espresso

Android Lead | Worldline, Chennai — January 2019 – April 2020

- Conducted requirement analysis with business and compliance stakeholders, translating domain needs into scalable, modular Android architecture for core fintech applications, and applying design patterns to improve reliability and scaling under strict compliance requirements.
- Integrated secure third-party REST APIs for real-time payment processing, banking operations, and financial data aggregation.
- Applied end-to-end encryption and OAuth 2.0 to protect sensitive financial and personal data in transit and at rest.
- Integrated Firebase Crashlytics for crash reporting and monitoring to improve app stability in production.
- Led unit, integration, and UI testing efforts (JUnit, Mockito, Espresso) and authored technical documentation for handoff and audits.

Tech Stack: Java, WebRTC, RESTful APIs, OAuth 2.0, Retrofit, Glide, MVVM, RxJava, Crashlytics, Espresso, Mockito, JUnit

Android Developer / Lead | Information Dynamics Pvt. Ltd, Chennai — July 2014 – November 2018

- Conducted requirement analysis with retail business and hardware stakeholders to define feature scope, then led architecture and feature development for large-scale retail Android applications using MVVM for maintainable, testable codebases.
- Integrated payment gateways and hardware communication interfaces (Bluetooth, Wi-Fi printers) for real-time invoicing.
- Owned QA practices including full-suite unit testing and performance profiling/optimization across diverse hardware.
- Held multi-year roadmap ownership for the retail application line, planning feature delivery and architectural evolution across successive release cycles.
- Mentored team members on architectural patterns, debugging techniques, and Android development standards.

Tech Stack: Java, Android SDK, RESTful APIs, Retrofit, Glide, MVVM, Bluetooth/Wi-Fi APIs, Payment Integrations

PERSONAL PROJECTS

Shared Android Library — Jetpack Compose Design System

- Building a reusable Jetpack Compose design system packaged as a shared Android library, designed to be consumed across multiple apps rather than tied to a single product.
- Centralises theming and UI components so new apps can adopt a consistent look and feel without re-implementing common building blocks.

Tech Stack: Kotlin, Jetpack Compose, Material Design, Gradle (library module)

EDUCATION

- M.Tech. in Software Engineering – CEG, Anna University, Guindy, Chennai
- B.E. in Electrical & Electronics Engineering – Andal Alagar College of Engineering, Tamil Nadu
- Higher Secondary Certificate (HSS) – Amalorpavam HSS, Pondicherry
